

## USA Campus Renovation Week 2022

### *Project List:*

~**Install LVT Flooring in the Union Springs SDA Academy Church** full basement hallway and classrooms. Due to mold issues and the age of the carpet, the Union Springs Church had to take out the original carpet that had been in the church basement. We are grateful the Union Springs church is a place of worship for our academy students. We do daily worships there as well as on the weekends for church.

~**The Girls Dorm** will get a new design look and paint job for the downstairs lobby entrance as hallways and stairwells. This is a major task for a painting crew. The girls dorm guest room will also get a 'makeover' renovation as it is outdated and greatly needed.

~**The Boys Dorm** will be completing the downstairs basement hallway with the final project to lay LVT flooring down.

~Paint the side of the boys dorm exterior wall by the parking lot.

~**Centennial Tribute Garden** was planned to be installed in front of campus between church and administration building. An alumnus who is an agricultural architect has provided us with a design concept and we look to launch the project this summer. This garden would include trees, flowers, and plants donated by alumni and friends in honor or in memory of a loved one. This project is still in the review stage for a final action plan this summer.

~**Other Landscaping Projects** on campus including pruning and seasonal upkeep for the cherry and apple orchard pruning, working in our greenhouse, and Sunset Hall flower beds, and mulching and new plants for around the administration building.
